Essentials vs Accessories

Indoor comfort in your home is about more than just adjusting the temperature on the thermostat. Many homeowners overlook the need for necessary components and systems that can improve the indoor air you breathe. Indoor air quality products and systems are quite frequently treated as accessories. We define them as indoor air essentials.

Whole-Home Evaporative Humidifiers

Why buy an evaporative humidifier?

The HE18F Evaporative Humidifiers provide whole-home humidification and use the warm air from the furnace with fan assist to evaporate water that is trickled over an internal humidifier pad.

- Improves indoor comfort throughout the home, helps to reduce dry skin, scratchy throat or electrostatic shocks that may be caused by low humidity levels
- Increases the relative humidity in your home, allowing you to lower the setting on your thermostat and still have the same level of comfort
- Cost effective option to add humidity to your home's indoor air compared to steam humidification
- Whole-home humidification without the need for frequent water re-filling and pad cleaning, compared to portable humidifiers¹

Whole-Home Electode Steam Humidifiers

Why buy an electrode steam humidifier?

Clean Comfort Steam Humidifiers automatically help to maintain comfortable humidity levels in homes when dry indoor air might cause problems. Proper humidification enhances indoor comfort and helps to lessen static electricity and other damaging effects of dry air.

Benefits include:

- Automatic whole-home indoor humidification without the need for frequent water re-filling and pad cleaning, compared to portable humidifiers
- Ideally suited for indoor heating and cooling systems that have lower air flows and air temperature in the ductwork that might reduce humidity delivery when using an evaporative whole home humidifier
- Proven electrode steam humidification performance from the manufacturer that invented the technology over 40 years ago

Why is my portable humidifier not sufficient?

Stand-alone or portable humidifiers simply cannot support a home's total humidity requirements. They are only capable of providing humidity in the proximity of the room where they are located. Whole-home humidifiers provide humidity to all of the conditioned airflowing through the home and do not deposit dried mineral dust on the floor like portable humidifiers can. Whole-home humidifiers also do not require manual refilling or cleaning like portable units.

Room/Portable vs Whole-Home

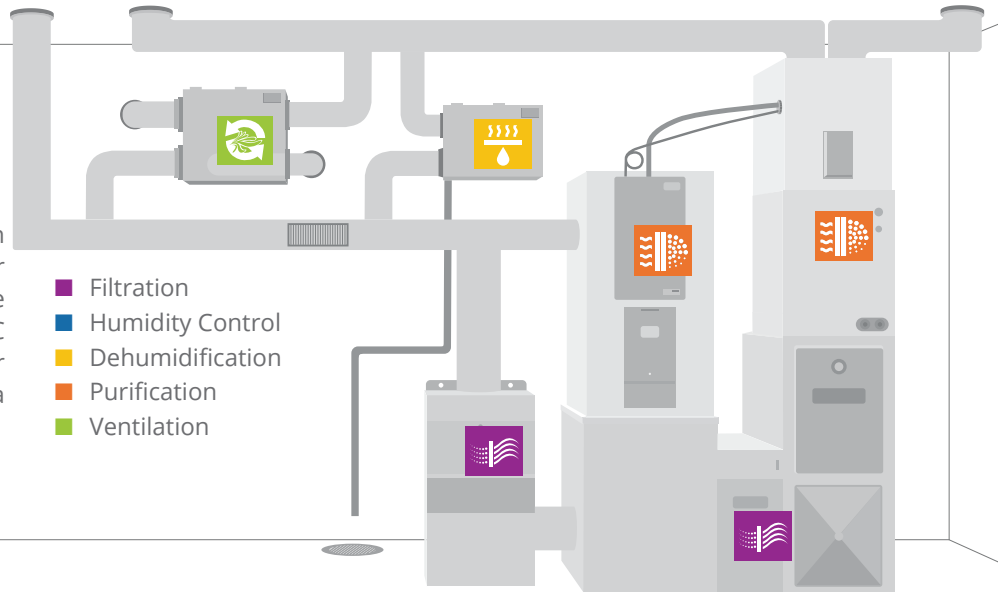

PURE. CLEAN. AIR.

Whole-home indoor air quality solutions

Clean Comfort Indoor Air Essentials can improve the quality and comfort of your home's indoor air. Components can be installed on virtually any brand of HVAC equipment in any home or installation. (For illustration purposes only, we have shown a basement installation.)

- Filtration
- Humidity Control
- Dehumidification
- Purification
- Ventilation

Our complete family of Clean Comfort products improves indoor air quality:

Filtration

Air filtration systems capture up to 95% of particles ranging in size down to 0.3 micron and keep them from recirculating back into your home's air.

- 5-Stage Air Treatment
- Hepa Air Cleaner
- Media Air Cleaner
- Electronic Air Cleaner
- Hybrid Air Cleaner
- Replacement Filters

Humidity Control

Dehumidifiers and humidifiers work with the home's heating and cooling system to help maintain a comfortable humidity level in every room.

- Whole-Home Humidifier
 - Bypass Evaporative Humidifier
 - Steam Humidifier

Dehumidification

Dehumidifiers work with the home's heating and cooling system to help maintain a comfortable humidity level in every room.

- Whole-Home Dehumidifier

Purification

Air purification systems are attached to the furnace or air handler, contaminants are deactivated before the air is recirculated back into the home.

- In-Duct Air Purifier
- Coil Purifier
 - For Furnaces
 - For Air Handlers

Ventilation

Ventilation systems replace stale indoor air with outdoor air — providing the fresh-air feel of an open window, with minimal heat/energy loss.

- Heat Recovery Ventilator (HRV)
- Energy Recovery Ventilator (ERV)
