

TOSOT

TOSOT

YOUR TRUSTED COMPANION

Let us introduce ourselves. We are TOSOT Bathica. As your trusted companion, our role is to get you comfortably, efficiently, and reliably through the tough Canadian winters and the hot summer months. To achieve this, our team worked diligently identifying and analyzing four pillars of our global value package.

THOSE FOUR PILLARS ARE:

- › 1. Reliable and efficient equipment
- › 2. Support, Training and Education
- › 3. Logistics
- › 4. Communication

BENEFITS

- › ULTRA HEAT heatpumps are our most efficient heatpumps
- › Complete residential and light commercial line-up
- › Designed for the North American climate
- › Smart defrost, pan heaters and crankcase heaters
- › Certifications: AHRI and Energy Star

Each pillar represents several constituents that are constantly being improved to maximize value for our dealers and distribution partners. Aside from the equipment, this also sets us apart from the rest in terms of level of excellence.

In many cold-climate regions of the world, the husky represents performance and reliability in extreme conditions. Snow, our husky, represents these values and reminds you that TOSOT Bathica will be Your Trusted Companion.

APEX CENTRAL HEAT PUMPS

18-17.5 SEER INVERTER

24,000 BTU TO 60,000 BTU

ULTRA HEAT

- › High And Low Pressure Protection Features
- › 24V Controls Compatibility
- › Overload Protection Features
- › Field Adjustable Capacity
- › 100% Heating Capacity at -20° C / -4° F
- › Universal Indoor Unit Compatibility
- › 78% Heating Capacit at -30° C / -22° F
- › Built-In Drain Pan Heater
- › Intelligent Defrost

1-to-1 COMMERCIAL
INVERTER SERIES
HEAT PUMPS

SEER 18-16
18000 BTU À 48000 BTU

Reliable, efficient, sophisticated and powerful are the words that best describe the LIGHT COMMERCIAL series. The Light Commercial series is a very quiet, BMS capable, inverter driven mini-split using R410A refrigerant that is engineered to provide heat even at -20° C / -4° F. The variety of indoor units will help you with any type of commercial applications, we have cassettes, slim-ducts or floor-ceiling units to cool or heat your environment. If you are looking for technology, comfort, reliability and an efficient auxiliary source of heating, the LIGHT COMMERCIAL series is for you.

- › Heating down to -20° C / -4° F
- › Built-In Drain Pan Heater

PORTABLE AIR CONDITIONER

GPC06AK-A3NNA2B

10,000 BTU
115V • 60HZ • 1PH

DEHUMIDIFIER

TIMER INCLUDED: EE:2
TANK: 7.61 L

GDN50BA-A3EBA2B

50 PINT/D
115V • 60HZ • 1PH

GLOSSARY

AIRFLOW

A measure of the amount of air per unit of time that passes through the device. It is measured in CFM (cubic feet per minute).

COP

Stands for Coefficient of Performance. It is the ratio between the cooling or heating provided and the electrical power consumption.

EER

Stands for Energy Efficiency Rating. It measures the ratio of output power to the input power.

REFRIGERANT

A refrigerant is the substance used to «move» the heat outside (or inside) of the room where the device is. We use the refrigerant R-410A as it is environmentally friendly and allows for the design of smaller and more efficient systems compared to R-22.

BTU/h

BTU is the British thermal unit. It is the amount of energy needed to cool or heat 1 pound of water by 1° F. The BTU/h is the unit of power used in HVAC. It corresponds to approximately 0.29 Watt.

DEHUMIDIFICATION

A measure of the amount of water per unit of time that the device is able to extract from the ambient air. It is measured in litres per hour.

HSPF

Stands for Heating Seasonal Performance Factor. It is the ratio between the seasonal heating output and the electricity used.

SEER

Stands for Seasonal Energy Efficiency Ratio. It is the ratio between the seasonal cooling output and the electricity used.

SOUND PRESSURE LEVEL

Sound Pressure is the force of a sound on a surface perpendicular to its direction. It is measured in Pa (Pascal). The lowest sound pressure that can be heard is 2x10 Pa. The Sound Pressure Level is a comparison of the measured sound to the lowest sound pressure hearable. The units are expressed in terms of dB (decibel) which is not linear, that is, if the pressure is Doubled, the Sound Pressure Level increases by 6dB. For example, the lowest hearable sound is 0dB while a quiet room is 40dB.

TOSOT
